## 👤 PROFILE

Recent graduate specializing in web development with foundational experience in Java programming. Proven track record of effective multitasking and a strong independent work ethic. Focused on team collaboration and continuous technical skill improvement. Focused on contributing to team objectives while enhancing technical skills. Eager to face new challenges and support organizational initiatives with commitment and energy.

## 🎓 EDUCATION

**B.E. in Computer Science** 2022 – 2025  
JSPM Narhe Technical Campus Pune, Maharashtra  
**CGPA** : - 8.67/10

**Diploma In Computer Engineering** 2019 – 2022  
Government Polytechnic Pune Pune Maharashtra  
**Percentage** : - 89.7/100

**SSC** 2013 – 2019  
N.M.V. Girls High School & Jr. College Pune Maharashtra  
**Percentage** : - 91.60/100

## 🧠 SKILLS

- HTML, CSS, Bootstrap, JavaScript
- SQL
- Java Programming
- Object Oriented Programming
- Data Structure

## 📁 PROFESSIONAL EXPERIENCE

**YBI Foundation** 01/2024 – 03/2024  
Intern Pune Maharashtra

Fulfilled an online internship in data science and cloud computing over three months. Used Jupyter notebooks to document data workflows, ensuring reproducibility. Boosted efficiency by integrating cloud platforms with virtualization solutions. Advanced data analysis supported by employing novel technological tools.

## 📁 PROJECTS

### Sweet Shop Website

A sweet shop website uses HTML to structure product displays and content, CSS for visually appealing styling and responsive design across devices, and JavaScript to enable interactivity like shopping carts, search, and dynamic elements. Its purpose is to showcase products, engage customers, and potentially facilitate online orders, offering a seamless online experience.

### Bank Application

This Java program creates a basic console-based banking application. It allows users to set up a new account or log in as an existing user. Account functionalities include depositing and withdrawing money, checking the current balance, and viewing a record of past transactions. The application uses the StringBuilder to store transaction history.
